DALnet Avatar 1.3.5 Network Adapter: Where To Find It

=====

Article Created: 6 August 1992
Article Last Reviewed:
Article Last Updated:

TOPIC -----

Where is the DAL 1.3.5 AVATAR client driver for clients using the Avatar Gateway (4.01) and MacMainFrame Client software?

DISCUSSION -----

You can find the DALnet Avatar 1.3.5 network adapter on the DAL 1.3.5 Install Disk. The path is:

- DAL Install
 - DAL Files
 - DAL Network Adapters

Note that you need to do a "customized" installation to select support for 3270-type connections such as Avatar MacMainframe.
