System Software: "Install Me First" Disk and System Enablers

==

Article Created: 2 September 1992

TOPIC ---

Will Apple be providing a solution to the problems, addressed in the
article titled "PowerBook 145: Peculiarities With System Software Version
7.0.1", for future PowerBook models that are introduced without a new release
of system software?

DISCUSSION --

Yes. Apple will be including an "Install Me First" disk (referred to as a
"System Enabler") with future PowerBook models.

This System Enabler disk will include minor changes to the system software
shipped with the new product that are specific to that product.

System Enabler disks began shipping with System 7.1 installation disks.
