Macintosh Quadra 900 & 950: "About This Macintosh" Peculiarity

==

Article Created: 15 September 1992

TOPIC ---

I recently upgrade my Macintosh Quadra 900 to a Macintosh Quadra 950. When
I checked the "About This Macintosh ..." in the Apple menu, it showed only
"Macintosh Quadra" instead of the expected "Macintosh Quadra 950".

DISCUSSION --

This is a function of the system software version 7.0.1 Installer. To have
the "About This Macintosh ..." window display the 950 model number on a
Macintosh Quadra 900 that was upgraded to a Macintosh Quadra 950, you need
to reinstall the system software using the Installer.

Note

There is no impact to the user in terms of functionality when the 950 model
number is omitted.
