System 7.1: Fixes Disappearing Folders and Files Problem

=====

Article Created: 19 October 1992

TOPIC -----

Does System 7.1 fix the problem of disappearing folders and files that was reported with System 7.0?

DISCUSSION -----

System 7.1 includes the contents of the System 7 Tune-Up 1.1.1 disk, as well as Disk First Aid 7.1. Disk First Aid 7.1 now repairs hard drives with the disappearing folders and files problem.

Before this, there was no utility to effectively repair this problem. The only fix was to back up your hard drive and reinitialize the drive.

To prevent this problem from recurring, either upgrade to System 7.1 or install System 7 Tune-Up 1.1.1 over System 7.0 or 7.0.1.
