Macintosh PC Exchange: Symptoms of INIT Conflicts

=====

Article Created: 4 December 1992

TOPIC -----

What kind of symptoms are usually associated with INIT conflicts when using Mac PC Exchange?

DISCUSSION -----

Here are some typical symptoms of INIT conflicts:

- System won't mount a correctly formatted DOS disk without being told that it's unreadable.
- Can't open the Macintosh PC Exchange control panel to make changes.
- System freezes when mounting a correctly formatted DOS disk.
