Apple Software: Current Versions (10/96)

=====

Article Created: 7 December 1992
Article Reviewed/Updated: 9 October 1996

TOPIC -----

The table below lists versions of SHIPPING Apple software products and provides the following information for each:

Version

The current version number.

7.5.3 rev 2?

Whether the product is supported with System Software 7.5.3 rev 2 (SSW 7.5.3 rev 2).

Some products, are listed as unsupported, but may be fully compatible. For example, TeachText is listed as not supported with System 7.5, because it has been replaced by SimpleText. This does not necessarily mean that TeachText does not work with System 7.5.3 rev 2.

Notes

Additional information on the product

Additional articles in the Tech Info Library describe many of the products listed below more fully. This article does not cover any announced Apple products which are not currently shipping.
