Apple Scanners: Bundled Software Compatibility (8/96)

Article Created: 12 December 1992
Article Reviewed/Updated: 07 August 1996

TOPIC -----

This article discusses the compatibility of:

- the Apple Color OneScanner with output devices
- the Apple Color OneScanner with OCR software
- Ofoto 2.0 software with earlier Apple scanners

DISCUSSION -----

ColorSync Software and Output Devices

The Apple Color OneScanner supports ColorSync, Apple's unique color matching software, providing accurate colors and tones. When used with the Macintosh Color Display and the Apple Color Printer, the Color OneScanner is part of a total color solution that assures consistent color from scanning to display and printing so that the original image looks like the printed document.

Optical Character Recognition Software

The Color OneScanner works well with third-party OCR software. OmniPage Professional's AnyPage technology dramatically enhances recognition for a wide variety of documents.

Earlier Apple Scanners

Ofoto 2.0 and the Scanner driver 3.0 are backward compatible with previous Apple scanners.

Ofoto 2.0 works with both the Apple Scanner (4-bit) and OneScanner (8-bit). Scanner driver 3.0 is compatible with previous versions.

Bundled Software Compatibility

Begin_Table

=====+					
Software	Scanner				
	Apple Scanner	OneScanner	Color OneScanner	Color OneScanner 600/27	
HyperScan 2.0.1	Yes	Yes	Yes	No	
AppleScan 1.0.2	Yes	Yes	No	No	
Ofoto 2.0.2	Yes	Yes	Yes	No	
ColorSync	No	No	Yes	Yes	
Scanner 3.0	No*	No*	Yes	No	
Scanner 2.0	Yes	Yes	No	No	
OneScanner Dispatcher SW	No	No	No	Yes	
=====+					

End_Table

* the Scanner 3.0 extension WILL work with the Apple Scanner and Apple OneScanner IF System 7 is being used. If System 6 is being used then you should use Scanner 2.0 with the Apple Scanner or Apple OneScanner.

AppleScan 1.0.2 and 32-Bit Addressing

The AppleScan application is not a 32-bit clean application. In order to use the Apple Scanner with any Macintosh Quadra/Centris AV or Power Macintosh Computer, you must upgrade to Ofoto 2.0.x from Light Source Inc., or use another compatible scanning application.

Article Change History:

07 Aug 1996 - Updated to include latest scanner and software.
31 May 1994 - Included all bundled software compatibility chart.
