System 7.0 and 7.0.1: Print Drivers Shipped with the Software

=====

Article Created: 7 January 1993

TOPIC -----

What version of the Personal LaserWriter LS and StyleWriter Chooser
Extensions (print drivers) come with System 7.0.1?

DISCUSSION -----

The original versions of these drivers shipped with system software versions 7.0 and 7.0.1. The version field in the Finder's Get Info command says these are the 7.0 drivers. It also says they're part of System Software 7.0.1. You can get the upgraded versions of these drivers from the usual sources.
