ABS Tech Note: DAL00 About DAL Tech Notes (11/93)

=====================================================================

Article Created: 30 November 1993

TOPIC -------------------------------------------------------------

This document accompanies each release of Apple Business Systems Technical
Notes.

DISCUSSION --------------------------------------------------------

We want Technical Notes to be distributed as widely as possible, so they
are sent to all Partners and Associates at no charge; they are also posted
on AppleLink in the Developer Services Bulletin Board and Tech Info
Library.

We place no restriction on copying Technical Notes, with the exception that
you cannot resell them, so read, enjoy and share.  We hope Apple Business
Systems Technical Notes will provide you with lots of valuable information.

Technical notes are a 'living' complement to product documentation, be it
Inside Macintosh or other documentation.  This means that they are updated
on a regular basis, so as to be accurate and up to date.  New Notes are
added as required.

This technical note is an index of all technical notes related to the Data
Access Language and related products.  It also documents all changes to the
technical notes since the previous release.
