LaserWriter Pro 600 for Windows: Description   (4/93)

==

Article Created: 5 April 1993

TOPIC ---

This article describes the LaserWriter Pro 600 for Windows printer.

DISCUSSION ---

The Apple LaserWriter Pro 600 for Windows provides 600 dots-per-inch (dpi)
resolution and lets you print text at four times the resolution of
conventional laser printers.

Because it uses Apple PhotoGrade and FinePrint technologies, the LaserWriter
Pro 600 can give you high-quality images and graphics even at 300 dpi.
PhotoGrade technology allows up to 91 levels of gray, the equivalent of 1000
dpi. FinePrint smooths out lines and curves in text and line art that would
otherwise appear jagged.

The LaserWriter Pro 600 for Windows is compatible with Windows and major
MS-DOS applications because it uses Adobe PostScript Level 2 software and HP
LaserJet IIP (PCL 4+) emulation. Automatic emulation-switching software
allows DOS and Windows users to switch easily between PostScript and LaserJet
IIP emulation modes.

The LaserWriter Pro 600 offers plug-and-play installation. Parallel, serial,
and LocalTalk ports connect the printer to Windows, DOS, and other computing
environments. All ports stay active so you can send documents to any port,
without having to change a single setting.

For added flexibility, the LaserWriter Pro 600 comes with two paper trays and
an expandable array of options, including a 500-sheet feeder and a 75-envelope
feeder. The LaserWriter Pro 600 has a total paper-handling capacity of 850
sheets.

Print Quality

• 600-dpi resolution for high-quality text in PostScript mode
• PhotoGrade for enhanced images at 300 dpi, FinePrint for smooth text and
  lines in PostScript mode
• 300-dpi resolution HP LaserJet IIP (PCL 4+) emulation mode
• 75 fonts for printing in a wide range of sizes and styles

Compatibility with Windows and DOS

• Simultaneous connection to parallel, RS-232 serial, and LocalTalk ports
• Adobe PostScript Level 2 software and HP LaserJet IIP (PCL 4+) emulation
• Automatic emulation switching between PostScript and HP LaserJet IIP
  emulation modes; LaserTools Printer Control Panel software included

Convenience and Flexibility

• Two (100- and 250-sheet) paper trays
• Optional envelope feeder (75-envelope capacity)
• Optional 500-sheet feeder
• Maximum capacity with options: 850 sheets
