WorldScript: Multiple Page Setups (3/93)

======================================================================

Article Created:  29 March 1993

TOPIC:  ---------------------------------------------------------

Does WorldScript allow multiple "Page Setups" in the same document?

DISCUSSION:  ----------------------------------------------------

The Page Setup feature does not function any differently in the
WorldScript environment.  Its implementation is up to the application software,
which is responsible for saving the Page Setup options with its
documents.  We have not seen an application that allows multiple Page
Setups, but it is possible to implement.
