LaserWriter Pro 630 Windows Software: No Standalone DOS Support

===

Article Created: 25 May 1993

TOPIC ---

Do the Windows drivers that ship with the LaserWriter Pro 630 support DOS
(versions 3.0 and 5.0) machines using Word Perfect version 5.0?

DISCUSSION ---

The Windows software that ships with the LaserWriter Pro does not support
the standalone DOS environment. Apple ships the printer files which inform
the Windows PostScript driver of the LaserWriter Pro capabilities. That
is, tray options, imageable area, and others.

Apple doesn't ship the Windows PostScript driver. The Windows PostScript
driver is automatically included when customers purchase MicroSoft Windows.

Word Perfect Corporation provides printer drivers that work with
their applications. To locate a vendor's address and phone number, use
the vendor's name as a search string.
