Apple Early Learning Connections: Grady Profile Error T106

=====

Article Created: 2 June 1993

TOPIC -----

This article discusses a problem when using the Grady Profile in the Apple Early Language Connections.

DISCUSSION -----

When you record a reading sample in the Grady Profile with a name that's too long, you receive "Error T106" messages. You must keep the title of the reading sample to 31 characters or less (this includes spaces and punctuation).

Example: Naming the sample "The Emperor's New Clothes 12/13/92" it is too long. Shortening the title to "Emperor's New Clothes 12/13/92" corrects the problem.
