Apple Workgroup Server Product Family (5/93)

==

Article Created: 24 May 1993

TOPIC ---

This article describes the Apple Workgroup Server product family.

DISCUSSION --

• Apple Workgroup Server 60
  Low-cost file-and-print server for small "Mac-mainly" workgroups, based
  on Centris 610 hardware, Macintosh System 7, and AppleShare 4.0.

• Apple Workgroup Server 80
  Midrange file-and-print server for medium "Mac-mainly" workgroups, based
  on Macintosh Quadra 800 hardware, Macintosh System 7, and AppleShare 4.0.
  The Apple Workgroup Server 80 comes with integrated DDS tape backup drive
  and Retrospect Remote backup/administration software.

• Apple Workgroup Server 95
  Powerful file-and-print server and database workgroup server. Based on
  Macintosh Quadra 950 hardware, PDS upgrade card, and A/UX 3.0.1 operating
  system.

  File server configuration: AppleShare Pro.

  Database configuration: Oracle 7 database system.

  The Apple Workgroup Server 95 comes with integrated DDS tape backup
  subsystem, two disk drives, 32 MB RAM, four SCSI channels for up to 28
  SCSI devices, and Retrospect Remote backup/administration software.
