Apple Workgroup Server 95: Customize Windows (6/93)

===

Article Created: 11 June 1993

TOPIC ---

Is it possible to customize the size and appearance of the windows for the
"root" level of each volume? We are accustom to viewing folders sorted "by
name" rather than "by icon" as the default.

DISCUSSION --

The Administrator can change the window view, and if a user has write
privileges to the volume or folder being mounted, the user could change the
view.
