Centris 660AV & Quadra 840AV: Speech Recognition Settings (8/93)

======================================================================

Article Created: 10 August 1993
Article Reviewed/Updated: 19 August 1993

TOPIC -------------------------------------------------------

What settings must I check to enable speech recognition on the Macintosh
Centris 660AV and Quadra 840AV?

DISCUSSION --------------------------------------------------

For speech recognition to work, the Sound control panel settings must be:

• Sample rate: 24.000 kHz  (This is the preset rate)

To set the sample rate:
1) Open the Sound control panel
2) Choose Sound Out from the pop-up menu
3) Choose 24.000 kHz from the Rate pop-up menu

• Input Source: Microphone (This is the default setting.)

1) Open the Sound control panel.
2) Choose Sound In from the pop-up menu.
3) Click on the Options button.
4) Click the radio button marked Microphone.
5) Click the OK button to return to the Sound control panel.

• Playthrough: off  (This is the default setting.)

1) Open the Sound control panel.
2) Choose Sound In from the pop-up menu.
3) Click on the Options button.
4) Make sure the checkbox marked Playthrough is unchecked.
5) Click the OK button to return to the Sound control panel.
