Macintosh Color Classic: Internal SuperDrive Connector

Article Created: 21 May 1993

TOPIC -----

This article gives the pin assignments and functions for the internal 20-pin internal connector for the high-density floppy disk drive (Apple SuperDrive).

DISCUSSION -----

Floppy Disk Drive

The Macintosh Color Classic computer supports one internal high-density floppy disk drive (Apple SuperDrive). The drive is connected to the logic board by a 20-pin connector. Table 1-2 shows the pin assignments for the floppy disk connector.

| Table 1-2 | Pin assignments f | for the internal | floppy disk | connector |
|-----------|-------------------|------------------|-------------|-----------|
|-----------|-------------------|------------------|-------------|-----------|

| Pin number | Signal name | Signal description |
|------------|-------------|--------------------------------|
| 1 | GND | Ground |
| 2 | РН0 | Phase 0: state-control line |
| 3 | GND | Ground |
| 4 | PH1 | Phase 1: state-control line |
| 5 | GND | Ground |
| 6 | РН2 | Phase 2: state-control line |
| 7 | GND | Ground |
| 8 | PH3 | Phase 3: register write strobe |
