Retrospect: Error -35 & Error -53 (8/93)

=====

Article Created: 18 August 1993

TOPIC -----

What do the following Retrospect errors mean?

- Error -35 (volume doesn't exist)
- Error -53 (volume off-line)

DISCUSSION -----

The Errors -35 and -53 (volume doesn't exist, volume off-line) mean that Retrospect cannot find a volume when it is time to perform a backup.

What to do: Make sure the volume is actually connected to the Macintosh and that it is mounted on the Desktop. If it is, click the Immediate icon in the Retrospect Directory, then click View to scan the volume and display the Browser.

For further information on working with Retrospect and Retrospect A/UX, search the Tech Info Library by "Retrospect" or "Remote."
