Apple Workgroup Server 95 PDS Card: SCSI Port Max Transfer Rate

===

Article Created: 26 August 1993

TOPIC ---

What is the maximum transfer rate of the SCSI ports on the Apple Workgroup
Server 95 PDS card?

DISCUSSION ---

The theoretical maximum for the SCSI bus is 5MB per second. The actual
aggregate performance is around 4.5MB per second.

Maximum throughput for the 500MB and 1000MB drives on the SCSI DMA port of the
Apple Workgroup Server 95 are as follows:

• Reads : 3MB per second
• Writes: 2MB per second
