At Ease 2.0 for Workgroups: If a User Forgets a Password (8/95)

===

Article Created: 21 September 1993
Article Reviewed/Updated: 14 August 1995

TOPIC ---

We use At Ease 2.0 for Workgroups on an AppleTalk network. One of our users
forgot his password. He had changed the password from the one the administrator
had assigned to him. How can he regain access to At Ease?

DISCUSSION --

The administrator password always works with any user name. To create a new
password:

Step 1

Enter the administrator password.

Step 2

Open At Ease Setup.

Step 3

Click Users.

Step 4

Click the name of the user whose password you want to change.

Step 5

Type the new password where the bullets (dots) appear.

Article Change History:

14 Aug 1995 - Corrected minor typo.
08 Aug 1995 - Added keyword and reviewed for technical accuracy.
