AOCE: PowerTalk Icons Presented On The Desktop (10/93)

=====

Article Created: 4 October 1993

TOPIC -----

This article describes the new icons found on the desktop with PowerTalk.

DISCUSSION -----

PowerTalk puts three new icons on the desktop, the Catalogs icon, the Mailbox icon and the PowerTalk Key Chain.

Opening the Catalogs icon displays the different catalogs available. Examples include a PowerShare Catalog, the AppleTalk catalog, or an X.500 directory service.

The Mailbox contains all incoming and outgoing mail. Mail from any source, in any format is accessible through the Mailbox.

The PowerTalk Key Chain protects access to the services available through the Catalogs and Mailbox icons. The PowerTalk Key Chain provides users with one stop access to a variety of collaboration services.
