AppleShare 3.0.3 Patch & Print Server Versions (10/93)

===

Article Created: 5 October 1993

TOPIC ---

If I'm not mistaken, if you have Print Server 3.0 and you run either the
3.0.2 or 3.0.3 patch, there will not be any code changes made to the print
server however installing the patch will update the version number to 3.0.2
or 3.0.3 respectively. You effectively still have Print Server 3.0,
meaning the code fixes in 3.0.1 are not present.

DISCUSSION --

Installing the AppleShare 3.0.3 patch DOES NOT change the version number of
the AppleShare Print Server. The version number on the Admin program and
the File Server are upgraded but the Print Server is not changed.
