CopyDoubler: System 7 Pro Incompatibility (10/93)

Article Created: 4 October 1993
Article Revised/Updated: 23 November 1993

TOPIC -----

The System 7 Pro 7.1.1 Compatibility Checker reports that CopyDoubler 2.0.1 is compatible, but it should be listed as just "mostly compatible."

CopyDoubler 2.0.2 is compatible with System 7 Pro 7.1.1.

DISCUSSION -----

If you have CopyDoubler's "Fast Empty Trash" enabled, it won't let you empty the trash if Apple Mail items have been thrown away. This also causes a crash about half the time.

We've reported this problem to Fifth Generation Systems.

Article Change History:
23 November 1993 - added that 2.0.2 is compatible
