Radius RocketShare: PowerTalk Incompatibility (10/93)

===

Article Created: 15 October 1993

TOPIC ---

I'm using Radius RocketShare on a Quadra running PowerTalk. My
computer hangs when launching Mission Control. It only happens if
PowerTalk services are turned on.

DISCUSSION --

Some change in the handling of the EFS made RocketShare look to the
Mail Enclosures as a Rocket Disk (without of course identifying it as
such.)

Radius is testing a maintenance update to be called 1.1.1 that will be
posted to AppleLink, AOL, Compuserve and Radius Anonymous FTP.
