LW Pro 810: Media Kits For Hosts (11/93)

==

Article Created: 21 October 1993
Article Reviewed/Updated: 29 November 1993

TOPIC ---

This article describes the media kits for non-Macintosh host on the
LaserWriter Pro 810.

DISCUSSION --

Customers purchasing a LaserWriter Pro 810 will require Media Kits for each
type of non-Macintosh host system. The software to be installed will
supplement application drivers already on the host system for direct
printing to the LaserWriter Pro 810 over the network. These kits contain
the binary images, the actual software to be downloaded to the network.
Included in the kit is a guide and the actual media. The media itself
varies according to the host requirements shown below.

The table below shows the media kits:

System Type	Ships with LW Pro 810	Optional Media Kit
Macintosh	All necessary software	NA
UNIX host	Unix TAR format on 3.5" diskettes	QIC kit
DEC host	DOS format of VMS install on 3.5" diskettes	TK50 kit

Article Change History:
29 November 1993: Added Optional Media Kit information
