LaserWriter Pro 810: Windows, DOS Software Drivers (3/95)

Article Created: 21 October 1993
Article Reviewed/Updated: 3 March 1995

TOPIC -----

This article describes the software drivers for Windows or DOS.

DISCUSSION -----

Windows Software Drivers

Windows 3.0 and 3.1 drivers have been developed to support the LaserWriter Pro 810 printer. These LaserWriter Pro 810 specific drivers include a great deal of the functionality found in Macintosh utilities, and will allow the user to access all standard and optional paper trays as well as select the desired print quality.

DOS Software Drivers

In DOS, individual applications ship with their own drivers, providing optimal support for the actual software application. However, some select customized applications' drivers have been developed for LaserWriter Pro 810 printers, maximizing the benefits of the printers for users of these applications: AutoCAD, Word 5.0 (DOS), Word Perfect 5.1 (DOS), and PC Send (used to download to the serial port).

Locating Printer Drivers

The LaserWriter Pro 810 printer drivers can be found on the "LaserWriter Pro, Software for DOS" disk that came with the printer.

Article Change History:

03 Mar 1995 - Added where to to locate printer drivers.
18 Jul 1994 - Removed reference to a parallel port.
