Macintosh TV: Upgrading RAM to 8MB (10/93)

=====

Article Created: 18 October 1993

TOPIC -----

This article describes how to upgrade the RAM in a Macintosh TV from 5MB to 8MB. This procedure should be performed only by an Apple-authorized service provider.

DISCUSSION -----

To upgrade the RAM in Macintosh TV:

- 1) Remove the 1MB SIMM.
- 2) Install a Centris 610/650 4MB DRAM expansion kit, bringing the Macintosh TV's memory to 8MB.

DRAM Expansion Kit: M1507LL/A 4MB expansion kit
