HyperCard: Setting Field's Text Alignment (7/92)

==

Article Created: 4 November 1990
Article Reviewed/Updated: 23 July 1992

TOPIC ---

Here's a script that you can use to set the TextAlign property of a field
to determine the way lines of text are aligned in a given field.

DISCUSSION ---

```
on mouseUp (or openCard or any other handler)
   set TextAlign of field x to left --(or right, or center).
end mouseUp (or openCard or any other handler)
```

This script works in versions 1.2.5 and 2.0x of HyperCard.
