HyperCard: Finding and Displaying the Application Version (7/92)

======================================================================

Article Created: 4 November 1990
Article Reviewed/Updated: 23 July 1992

TOPIC -----------------------------------------------------------

Can I determine, without leaving HyperCard, what version of HyperCard is
running?

DISCUSSION ------------------------------------------------------

In the message box, type "the version". HyperCard will return the exact
version or revision number of HyperCard that is running.

This works in version 1.2.5 and 2.x of HyperCard.
