HyperCard: Script to Sum a List of Numbers (7/92)

Article Created: 16 January 1991
Article Reviewed/Updated: 23 July 1992

TOPIC -----

This function adds up a series of numbers. It demonstrates how to process both item lists and separate parameters.

DISCUSSION -----

```
function sum
  put 0 into total
  repeat with paramNum = 1 to the paramCount
    put param(paramNum) into list
    repeat with i = 1 to the number of items in list
      add item i of list to total
    end repeat
  end repeat
  return total
end sum
```
