HyperCard Through 2.1: "Word 3 to 1" Correction (7/92)

=====

Article Created: 28 February 1991
Article Reviewed/Updated: 23 July 1992

TOPIC -----

The next to last paragraph on Page 116 of the Script Language Guide states that

When the first number in a range is greater than the second, you get an empty string. For example, char 5 to 3 of "Motorcycle" yields "" or empty.

DISCUSSION -----

This holds true for char, but not for word. For example, word 2 to 1 of "Motorcycle gang" yields "gang", not empty.

This applies to HyperCard versions 1.x through 2.1.
