HyperCard 2.2: Message Box Enhancements (12/93)

===

Article Created: 13 December 1993

TOPIC ---

In HyperCard 2.2, the message box has two new features.

DISCUSSION --

• Command-Shift-A selects all text in the Message box when it's open for
  editing.

• You can control the font, style, and size of text in the Message box by
  setting its textFont, textSize, and textStyle properties (but you don't have
  access to the Text Style dialog box). For example, to make the type in the
  message box larger, type:

    set the textSize of the message to 14
