HyperCard 2.1: Power Tools Problems (7/92)

Article Created: 12 August 1991
Article Reviewed/Updated: 23 July 1992

TOPIC -----

This article describes some problems in the HyperCard 2.1 Power Tools stack.

DISCUSSION -----

- In the stack script's powerMenuItems function, the line just before "end powerMenuItems" should start with a quote.
- In the stack script's doInUseMenu handler, the line

```
{put "goStack" && it & "," after theMsgs}
```

should be

```
{put "goStack" && quote & it & quote & "," after theMsgs}
```
- When the Power Tools stack is in use, the Undo command will not work in other stacks, although It will continue to work in the Power Tools stack. Power Tools needs to be in use, not just open, to reproduce this problem.
