Campus Software Set for Macintosh: Opening Documentation (1/94)

Article Created: 6 January 1994

TOPIC -----

I purchased the Campus Software Set for Macintosh, and I can't open the electronic documentation for Macintosh PC Exchange or Retrieve It! programs.

DISCUSSION -----

The documentation for these applications is provided electronically only in Apple DocViewer version 1.0 format. If you can't open the documentation, be sure that DocViewer is installed. The installer for this package will place the DocViewer application in a folder called "Retrieve It! folder" at the top level of the hard disk. If you can't find Apple DocViewer v1.0 on the drive, run the installer for the Campus Software Set for Macintosh again, select Custom, and reinstall only the software for Retrieve It! as this will also reinstall Apple DocViewer v1.0.
