ABS Tech Note: AS05 AppleSearch Compatibility (1/94)

===

Article Created: 23 December 1993

TOPIC ---

This technical note describes AppleSearch and compatibility with System 7
Pro and Macintosh computers.

DISCUSSION --

In the Compatibility Checker application shipped with System 7 Pro,
AppleSearch's compatibility state is listed as not known, because at the
time the Compatibility Checker's data was frozen, AppleSearch had not yet
been released.

AppleSearch 1.0 has been tested against System 7.1 Pro as well as all
current Macintosh computers (including the AV machines) and there are no
known compatibility problems. A future version of the Compatibility Checker
will be corrected to show this fact.
