HyperCard: Converting 2.x Stacks Back to 1.2.5 (11/92)

=====

Article Created: 6 May 1991
Article Reviewed/Updated: 6 Apr 1994

TOPIC -----

It is not possible to convert a HyperCard 2.x stack to 1.x format using HyperCard alone. It is always a good idea to convert a copy of a 1.2.5 stack rather than the original. However, a utility named UnConvert from Heizer Software can perform this task.

DISCUSSION -----

UnConvert converts stacks from 2.x format back to 1.2.5. Of course, if a script uses any of the new 2.x features, those features will not be supported. If [the card size of] a 2.x stack is larger than [that of] a 1.2.5 stack, objects that would be off the card are moved onto the card, and any graphics will be clipped.

To locate a vendor's address and phone numbers, use the vendor's name as a search string.
