System 7.1.2: Support for 68040 or Earlier Macintosh (4/97)

=====

Article Created: 9 March 1994
Article Reviewed/Updated: 8 April 1997

TOPIC -----

Can I use System 7.1.2 to update the operating system of my 680x0 Macintosh?

DISCUSSION -----

Yes. Several 680x0 Macintosh, Performa, and PowerBook systems shipped with System 7.1.2 installed. If your computer has earlier versions of system software, you may safely update to 7.1.2 (which includes System Update 3.0).
