Macintosh Quadra AV: Activating Ethernet Requires Update (3/94)

=====

Article Created: 15 March 1994

TOPIC -----

When using a Macintosh Quadra 660AV or 840AV, Ethernet cannot be turned on while Virtual Memory and Speech Recognition are active. Is there a way to turn on Ethernet?

DISCUSSION -----

The version of the network software being used needs updating. Use Network Software Installer v1.4.2 or higher to update the software.
