```
TOPIC ------------------------------------------------------------
```

Which Macintosh computers can I use the DOS Compatibility Cards with?

```
DISCUSSION -------------------------------------------------------
```

The DOS Compatibility Card (M2153LL/A) can be used with the Quadra 610 and
Centris 610. It cannot be used with any other Macintosh models.

The DOS Compatibility Card for Power Macintosh (M3581LL/A) can be used with the
Power Macintosh 6100/60, 6100/66, or Performa 6100 series. It cannot be used
with the Power Macintosh 6100/AV series or any other Macintosh models.

Part numbers mentioned in this article are accurate as of this writing. Before
ordering, verify that they are still correct as they are subject to change.

Article Change History:
28 Jun 1995 - Added DOS Compatibility Card for Power Macintosh.
