Extension Manager: Not all Control Panels Listed (4/94)

===

Article Created: 8 April 1994

TOPIC ---

Why doesn't Extension Manager 2.01 list all control panels in the Control Panels
folder?

DISCUSSION ---

Extensions Manager will only list those files that have an INIT resource, or
files that are set to be listed regardless of whether they have INIT code in
them or not.

Using the Configure option you can add you own file types that Extensions
Manager should list. To find out the file type of a given control panel or
extension you may use DeskZap (a shareware desk accessory) or ResEdit.
