Upgrading Newton: Recognition Tip (4/94)

=====

Article Created: 15 April 1994

TOPIC -----

This article describes a tip for better handwriting recognition when upgrading from a Newton MessagePad to either the MessagePad 100 or Messagepad 110.

DISCUSSION -----

After restoring your data from your Newton Messagepad to your MessagePad 100 or MessagePad 110, go to the preferences section and reset your letter styles training.

You can do this by choosing Preferences in the Extras drawer, choosing Letter Styles, and tapping on "Return to original settings." Your recognition should be better than it was on the old unit even with the 'old' training data.
