DOS Compatibility Card: Cause of Diskette Error Message (5/94)

===

Article Created: 23 May 1994

TOPIC ---

I have a Quadra 610 DOS Compatible computer and when I try to switch to DOS, I
get a message that reads "Diskette error - Correct the problem and press any key
to retry". What is causing this to happen?

DISCUSSION --

This is caused when the PC Setup preference file or the drive container is
removed from the hard disk. When either of these are thrown away, the DOS
Compatibility Card doesn't know where to load the DOS Operating System from. To
fix this error, go to the PC Setup control panel and reset your drive
selections. If the drive container was thrown away, you need to create a new
drive container for the DOS Compatibility Card.
