QuickTake for Windows: Cable Pinouts (10/94)

===

Article Created: 27 July 1994
Article Reviewed/Updated: 10 October 1994

TOPIC ---

This article provides pinout information on the cable used with the QuickTake
for Windows.

DISCUSSION --

Here is the pinout for the QuickTake for Windows cable:

```
        Mac Din 8 (Male)            PC DB-9*
        ----------------           ---------
DSR         2                      4      DTR
TxD-        3                      2      RxD
SG          4                      5      SG
RxD-        5                      3      TxD
```

Pin 7 on the Mac side is connected to Pin 2 on the Mac side
Pin 8 on the Mac side is connected to Pin 4 on the Mac side

Pins 6, 7, and 8 on the PC side are jumpered together.

* - Depending on the DB-9 port on the PC, the connector you use may be a
    male or female DB-9.

Article Change History:
10 Oct 1994 - Added type of connector needed.
