MAE: How to Check the MAE 1.0a Patch Install (8/94)

===

Article Created: 4 August 1994

TOPIC ---

How to find out if the Macintosh Application Environment (MAE) 1.0a the patch was installed correctly.

DISCUSSION ---

Type the following commands:

```
mae -version       to get the version of MAE
what -s engine     to get the version of the engine
what -s macd       to get the version of macd
```

You should also make sure you've updated your system folder as described in the patch documents, removing the system folder is one way.
