A/UX 3.x.x and Apple Shared Library Manager (10/94)

==

Article Created: 10 October 1994

TOPIC ---

Can you tell me if the Apple Shared Library Manager (ASLM) runs on an A/UX
machine?

DISCUSSION --

According to Apple Shared Library Manager 1.1 Release Notes, the ASLM 1.1 should
work with A/UX 3.x.x. However, it is not officially supported. Here is the
note:

"ASLM 1.1 does not officially support A/UX, but it should work without any
problem. However, you will need to do a Custom Install in order to install under
A/UX. Choose "ASLM for System 7.0 and 7.0.1" from the Custom Install when
installing under A/UX."
