## LaserWriter 16/600 PS: Setting the IP Address from Bootp (2/95)

Revised:	2/1/95
Security:	Everyone
LaserWrite:	r 16/600 PS: Setting the IP Address from Bootp (2/95)
=======	=======================================
Article Cr	eated: 1 February 1995
TOPIC	
printed on IP address hardware a	erWriter 16/600 PS printer an incorrect IP address (0.0.0.0) is the start-up page. The printer can be printed too, and pinged but the cannot be extracted with bootp (in one situation, the Ethernet ddress from another device was being associated with the IP address of riter). The only way to set the IP address was manually.
DISCUSSION	
	ing is a list of the configuration files that used to set up the ing through BootP to the Laserwriter $16/600$ .
	the IP address is the same in the "/etc/hosts" file and the the ver configuration file
	test /etc/hosts 10 printtest
#Set up the	e BootP server configuration file
%more /etc	/bootptab
test:\	-bn conf:\
	=bp.conf:\ =/etc:\
