Microsoft Office: Command-Option-Tab Switches Apps (2/95)

=====

Article Created: 07 February 1995

TOPIC -----

I just installed System 7.5 and Microsoft Office and I notice that hitting the Command-Option-Tab key combination switches between applications.

Where did this feature come from?

DISCUSSION -----

Microsoft Office installs a Control Panel with an option called QUICKSWITCH that allows you to do this-it can be toggled on or off.
