System 7.5 Update 1.0: Why Skip Disk 4? Disk Contents List 4/95

=======================================================================

Article Created: 4 April 1995

TOPIC -------------------------------------------------------------

Can you tell me what pieces of system software are on the fourth disk of the new
System 7.5 Update 1.0 disk set?

I have several customers who are concerned that the Installer does not ask for
the fourth disk during installation. Although they and I both know that the
Installer is smart enough to only ask for what it needs, I would like to calm
their concerns about this installation.

DISCUSSION --------------------------------------------------------

After a little bit of experimentation with the installation diskettes, I have
found what each disk contains. I have listed the results at the bottom of this
article.

As you can see, most of the information on the fourth disk, "System 7.5 Update
1.0 - 4", pertains to PowerTalk updates with the exception of the Automated
AppleScript updates. So, if a user is not using PowerTalk or AppleScript on
their system, the Installer is smart enough to know this, hence, it does not ask
for the fourth disk.

System 7.5 Update 1.0 Installation Disk Contents
================================================

System 7.5 Update 1.0 - 1
-------------------------
Description                 Version     Where Installed?
-----------                 -------     ----------------
System 7.5 Update           1.0.2       System Folder
Finder                      7.5.1       System Folder
Finder Update               1.1         Extensions Folder
7.5 Update Read Me          N/A         Hard Drive (Top Level)
```

```
SimpleText                 7.5.1       Hard Drive (Top Level)

System 7.5 Update 1.0 - 2
-------------------------
Description                Version     Where Installed?
-----------                -------     ----------------
Apple Guide                1.2.5       Extensions Folder
Color StyleWriter Pro      1.5.2       Extensions Folder
