System 7.5: Maximum Number of Items in the Launcher (9/95)

=====

Article Created: 31 May 1995
Article Reviewed/Updated: 18 September 1995

TOPIC -----

What is the maximum number of items that I can put in the Launcher window under System 7.5?

DISCUSSION -----

The Launcher (v. 2.7) supports a total of eight buttons. If there are aliases in the root level of the Launcher Items folder, then only seven new buttons can be created by naming folders with a bullet (Option-8) as the first character. The Application button is created by default for the 'loose' aliases. However, if there are only folders whose names start with a bullet, then eight custom buttons can be created.

There is a 40 item limit under each of the eight buttons. Additional items do not display, even if they are placed inside the Launcher Items folder in the System Folder.

Article Change History:
18 Sep 1995 - Corrected typo in title.
11 Jul 1995 - Added information about button limit and Launcher version
