AppleCD: Designed For Horizontal Operation (6/95)

=====

Article Created: 5 June 1995

TOPIC -----

Will the AppleCD 300 or AppleCD 600 drives operate on their sides? I am not able to get it to work on its side.

DISCUSSION -----

Although you may have been successful in getting the AppleCD 300 and 600 to operate on its side, these mechanisms were not designed, tested, nor intended to be operated in the vertical orientation and therefore operating the drives in this position is not supported by Apple.
